

Marios Zavos

Managing Director at Cubic Wood

At Cubic Wood, we contribute to the optimization of the residential developments we work on based on a detailed understanding of our customers' needs and therefore ensuring the successful delivery of our offering. Having strong, long-term relationships with our suppliers in Italy, we provide quality kitchens, wardrobes, doors, bathroom units & furniture for residential and mixed-use developments for both contract & residential solutions in Cyprus and London.

Establishing ourselves as a one-stop shop for all the stakeholders (developers, interior designers, architects and even private clients), we are recognized for our comprehensive design services and broad array of products, able to undertake a project within budget and to the highest standards.

Our longstanding and close links with our suppliers provide our company some serious buying power. Moreover, we deliver furniture directly from the manufacturer to the client. This direct method combined with the low running costs our company keeps by not running a showroom therefore passes the savings on to the end customer.
